Holding time	0-60s(Adjustable)
EN16005	/
Parameter adjustment mode	Digital display adjustment
E-stop function	●
Always open (Fire alarm) function	●

### **Purpose-Built for Daily High-Traffic Use**

Designed with durability and efficiency in mind, the Easy Glide excels in environments with constant movement and heavy pedestrian traffic. Whether it's a bustling retail store, a dynamic school environment, or a commercial facility, this operator ensures uninterrupted and smooth functionality throughout the day. Its robust construction withstands the rigors of daily use, making it a reliable choice for spaces that demand consistent performance.

### **High-Performance Automation Built to Last**

At the core of the Easy Glide is a high-efficiency motor paired with intelligent control systems. These components work in harmony to deliver superior performance, characterized by smooth, whisper-quiet movement and optimized energy consumption. The operator's design balances aesthetics and function, seamlessly integrating into any architectural style while upholding rigorous performance standards. Whether for interior or exterior applications, the Easy Glide consistently meets the demands of heavy usage with ease.

### **Reliability Beyond Expectations**

Reliability is key for high-traffic entrances, and the Easy Glide delivers it effortlessly. Built with high-quality, durable materials, it is rigorously tested to ensure that every component meets exacting quality standards. The operator's engineering minimizes wear and tear, reducing maintenance requirements and operational downtime, so your business or institution can focus on what truly matters.

### **Certified for Superior Safety**

Safety is non-negotiable, especially in high-traffic environments, and the Easy Glide exceeds expectations in this regard. Certified to European Standards EN16005, it is equipped with advanced safety sensors to detect obstacles and ensure pedestrian protection. Its intelligent system stops the doors immediately in the presence of an obstruction, preventing accidents and ensuring safe passage for everyone, including children, elderly individuals, and those with mobility challenges.

### **The Perfect Fit for Shops, Schools, and Commercial Spaces**

Designed with adaptability in mind, the Easy Glide is a versatile solution suitable for a variety of applications. From retail outlets that demand reliable entrances for customer satisfaction to schools that prioritize safety and durability, and commercial spaces seeking sleek, modern automation, the Easy Glide is an operator you can rely on.

## Key Features

### Daily Heavy-Duty Performance

Designed to handle frequent use and heavy pedestrian traffic with ease.

### Certified Safety Compliance

Fully tested and certified to meet European Standards EN16005, ensuring maximum pedestrian safety.

### Durable and Long-Lasting

High-quality materials and robust construction for long-term reliability.

### Advanced Motor Technology

Energy-efficient and quiet operation for enhanced user experience.

### Customizable Operation

Adjustable speed and settings to suit specific operational needs.

### Low Maintenance

Engineered for reduced wear and tear, minimizing maintenance and downtime.

### Aesthetic Design

Sleek, unobtrusive design that complements any architectural style, whether modern or classic.

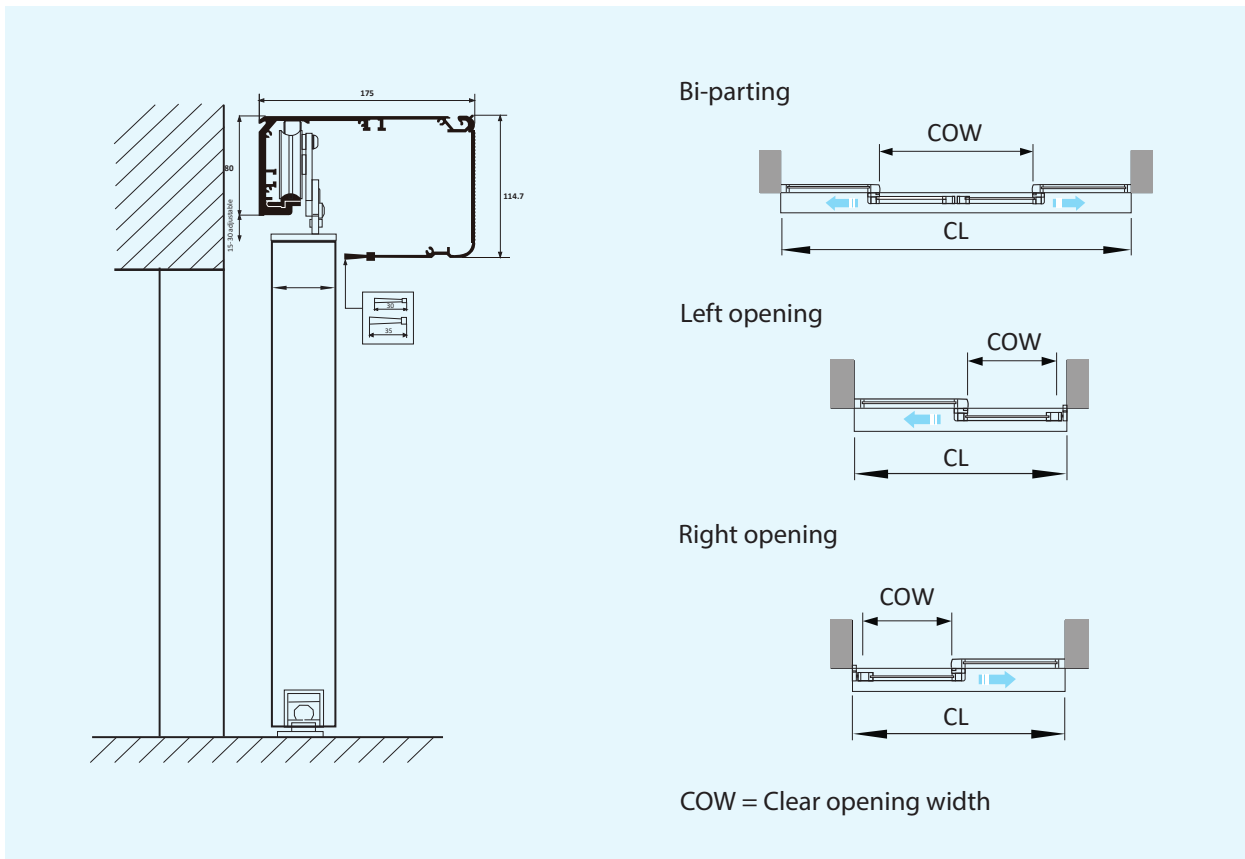

### Versatility in Application

Ideal for indoor and outdoor use in shops, schools, offices, and public facilities.

## Why Choose Easy Glide?

The Easy Glide automatic sliding door operator is more than just a functional entrance solution; it is a statement of reliability, innovation, and safety. It is a product designed not only to meet your operational needs but to exceed your expectations. With Easy Glide, you ensure effortless access for your visitors, peace of mind for your staff, and a welcoming experience for everyone who steps through your doors.

Elevate your entrance with the Easy Glide – the perfect balance of durability, performance, and safety in one exceptional solution
